It supports anytime access to online resources for learning by providing portable devices for each student for use at school and possibly at home at the discretion of school administration. The device ensures that students can access educational resources throughout the school day. Every student that has a device that provides real-time data to a reporting dashboard providing an interactive interface for students where they can access tools and resources, post their current work, track their progress, and interact with teachers and other students around their projects.

Carmi-White County C.U.S.D. #5 is preparing students for an ever-changing world that sees technological advancements happening at a rapid rate and is committed to preparing students for the path they choose after high school. One of the district's goals is to make measurable progress in closing the achievement gap for minority and low-income students. Carmi-White County School District is implementing the 1:1 Initiative to further personalize the way each student uses time, receives support to master essential skills, and deepens understanding of content. Finally, the device further prepares students for the use of technology in college/careers.

Use of Technology

All students in grades 6-12 will have access to Google Chromebooks for education use in school. The school administration will be responsible for issuing the Chromebooks to the students to take home in grades 9-12. Grades 6-8 will have access to Chromebooks at school. This document provides students and parents/guardians with information about the general use of technology, ownership of the devices, rights and responsibilities for possession of the device, educational use, care of the Chromebook, and being a good digital citizen. Additionally, the last page is a Chromebook Agreement form for parents to complete.

Students and their parents/guardians are reminded that use of school technology is a privilege and not a right and that everything done on any school owned computer, network, or electronic communication device may be monitored by school authorities. Inappropriate use of school technology can result in limited or banned computer use, disciplinary consequences, removal from courses, loss of credit, receiving a failing grade, and/or legal action as stated in district's Student Handbook. A copy of the Carmi-White County C.U.S.D. #5 Acceptable Use Policy is attached to this document.

Technology Fee

- A. For each republication (on a web site or file server) of a graphic or a text file that was produced externally, there must be a notice at the bottom of the page crediting the original producer and noting how and when permission was granted. If possible, the notice should also include the web address of the original source.
- B. Students and staff engaged in producing web pages must provide library media specialists with e-mail or hard copy permissions before the web pages are published. Printed evidence of the status of "public domain" documents must be provided.

- C. The absence of a copyright notice may not be interpreted as permission to copy the materials. Only the copyright owner may provide the permission. The manager of the web site displaying the material may not be considered a source of permission.
- D. The “fair use” rules governing student reports in classrooms are less stringent and permit limited use of graphics and text.
- E. Student work may only be published if there is written permission from both the parent/guardian and student.

11. USE OF ELECTRONIC MAIL

- B. Each person should use the same degree of care in drafting an electronic mail message as would be put into a written memorandum or document. Nothing should be transmitted in an e-mail message that would be inappropriate in a letter or memorandum.
- C. Electronic messages transmitted via the school district’s Internet gateway carry with them an identification of the user’s Internet “domain.” This domain name is a registered domain name and identifies the author as being with the school district. Great care should be taken, therefore, in the composition of such messages and how such messages might reflect on the name and reputation of this school district. Users will be held personally responsible for the content of any and all electronic mail messages transmitted to external recipients.
- D. Any message received from an unknown sender via the Internet should either be immediately deleted or forwarded to the system administrator. Downloading any file attached to any Internet-based message is prohibited unless the user is certain of that message’s authenticity and the nature of the file so transmitted.
- E. Use of the school district’s electronic mail system constitutes consent to these regulations.

Internet Safety

Internet access is limited to only those “acceptable uses” as detailed in these procedures. Internet safety is almost assured if users will not engage in “unacceptable uses,” as detailed in this authorization, and otherwise follow this authorization.

Staff members shall supervise students while students are using district Internet access to ensure that the students abide by the terms and conditions for Internet access contained in this authorization.

Each district computer with Internet access has a filtering device that blocks entry to visual depictions that are: (1) obscene, (2) pornographic, or (3) harmful or inappropriate for students, as defined by the Children’s Internet Protection Act and as determined by the superintendent or designee.

The system administrator and building principals shall monitor student Internet access.
